Worst Trades

- \$**ROCKETTRUMP** (2nd entry) — **-75.9%** (-1.52 SOL) — ALPHA, extreme dump bypassed SL
- \$**ROCKETTRUMP** (1st entry) — **-73.5%** (-1.47 SOL) — ALPHA, same token re-entered and dumped again

- \$**GAMEIFY** — **-26.0%** (-0.52 SOL) — DELTA, SL hit within 36 seconds

Bot	TP	SL	Min Score	Size	Max Pos	Timeout
ALPHA	+35%	-12%	45	2 SOL	8	30m
BRAVO	+20%	-12%	45	2 SOL	8	30m

Entry: Fibonacci retracement (0.382–0.500 zone) | **SL Slippage:** +3% on stops | **Age Filter:** <60m tokens only **Change from Runs #1-2:** Position size increased from 0.5 SOL → **2 SOL** (4x)

Observations & Flags

- **BRAVO had a breakout session** — after cumulative -104.2% across Runs #1-2, it posted +107.3% here with 3 clean wins. The PUMP_PHASE pattern found favorable setups in \$**credit**, \$**トム**, and \$**wefhut**
- **ALPHA got destroyed by \$ROCKETTRUMP** — entered the same token twice and lost -73.5% and -75.9%. Both times the dump blew through the -12% SL, resulting in -149.4% on a single token. With 2 SOL sizing, that's -2.99 SOL lost on one name
- **CHARLIE went 0 for 3** — all stop losses, no wins. Worst single-session performance for CHARLIE across all 3 runs. Previous sessions it was the most consistent bot
- **DELTA went 0W/2L/3T** — no wins, two real losses, three timeouts. Took 5 trades but couldn't find momentum

- **SL slippage is catastrophic on extreme dumps** — \$ROCKETTRUMP losses of -73.5% and -75.9% show the 3% slippage simulation is insufficient for real-world conditions on these tokens
- **710 tokens detected** — slightly lower than Runs #1-2 (801/788) but healthy
- **Fib conversion rate: 14.1%** (19/135) — lowest of all 3 runs
- **BRAVO's 23% Fib conversion** (7/30) was the highest of any bot this session
- **3 PumpSwap graduations observed** — \$RPU, \$Twump, and 2 others migrated during session

BRAVO vs Previous Sessions

Run	Trades	W / L / T	Win Rate	P&L	Size
Run #1	10	3 / 4 / 3	30%	-55.9%	0.5 SOL
Run #2	6	1 / 3 / 2	17%	-48.3%	0.5 SOL
Run #3	7	3 / 1 / 3	43%	+107.3%	2 SOL

Run #3 reversed BRAVO's trajectory entirely. The 43% win rate and strong TP captures (+59.7%, +33.1%, +25.9%) show PUMP_PHASE can work when market conditions align. The question is consistency — BRAVO remains the most volatile bot.
